Quality Designed for Proven Performance

Low NOx Series
Power Gas Burners

The Midco LNB LOW NOx gas burner was developed to meet today’s changing emission requirements to reduce the overall carbon footprint.

The air and gas are premixed through a modulating premix gas blower. The air and gas is ignited using a simple direct spark ignition system not requiring an additional pilot burner. Once the air and gas are premixed it is distributed through a high efficient metal fiber burner head. Premixing the fuel and air before ignition assures complete combustion with minimal levels of CO and NOx.

Our modular burner concept keeps the initial investment low and maintenance costs at a minimum compared to flue gas recirculation type burners.

Application Specific: Consult the Midco Engineering Team for specific emission requirements.

LNB 1000
Complete Package

Features

- Burner Capacity:
  LNB 500 - 100,000 to 500,000 BTU's
  LNB 1000 - 150,000 to 1,000,000 BTU's
  LNB 2000 - 400,000 to 2,000,000 BTU's
- NOx emissions less than 30 ppm corrected to 3% O₂
- Low CO
- High efficiency radiant heat release
- Universal Mounting flange
- Easy Installation
- Easy burner setup

LNB 1000
High Fire Blue Flame Mode

LNB 1000
Low Fire Blue Flame Mode
